

BUILD A SEAQUARIUM!

SOLVE THESE AREA AND PERIMETER PROBLEMS.

The seaquarium carpenters need to put together different shapes to figure out how to build the homes for the seaquarium's toothy residents. Find the area and perimeter of these shapes so the carpenters at the seaquarium can begin building stat!

Shark Fact! Sharks go into a trance, called tonic immobility, when they are flipped upside down. This allows scientists to work on sharks in open water.
